2004 CQ WW DX Contest CW

TARGET

Oceania Record by KH7X (2003)

7,673,314 5256/170/347

**Additional Tower
New Antennas**

Labuan, E. Malaysia

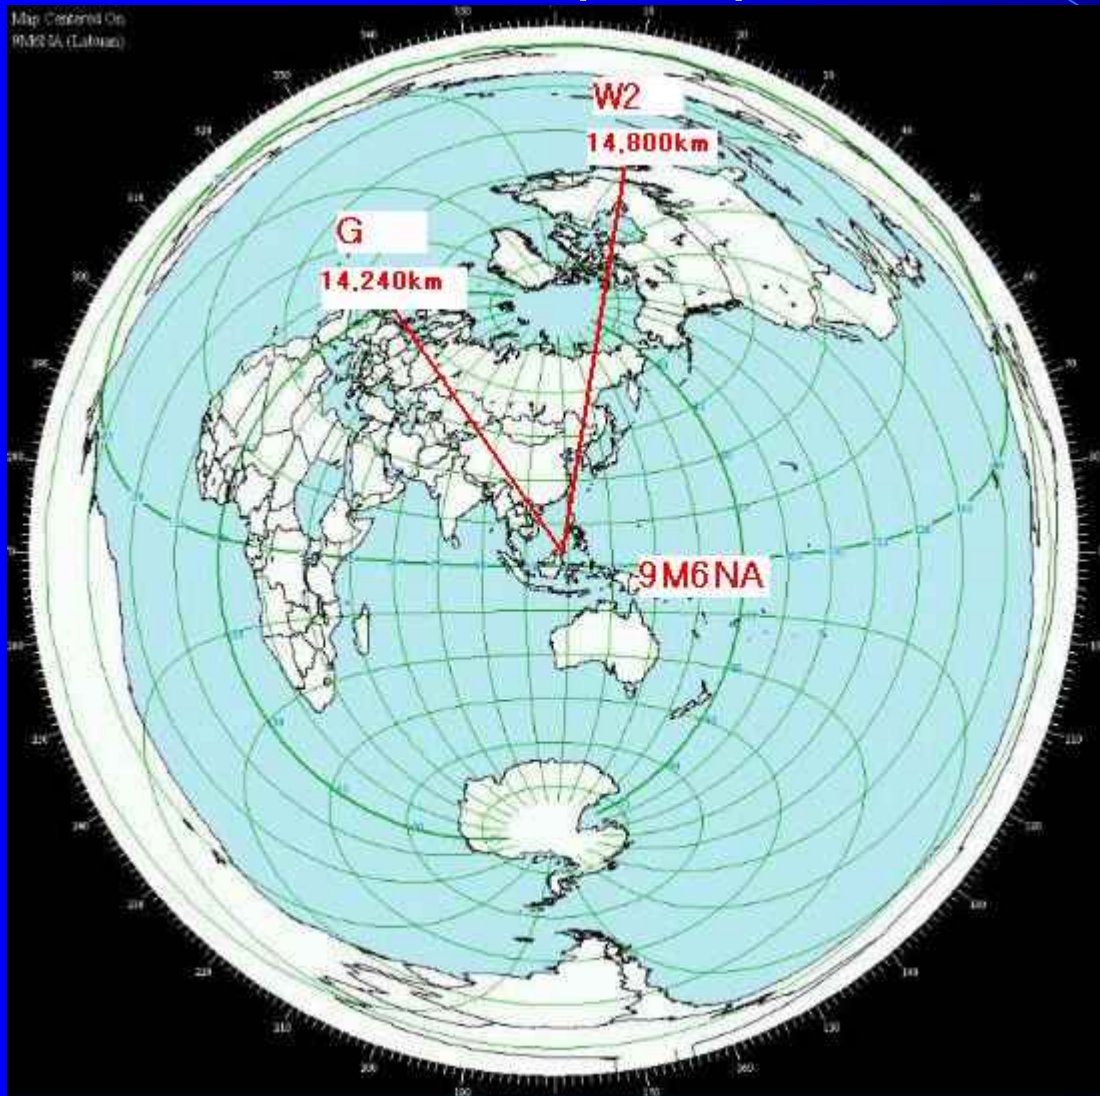

9M6NA

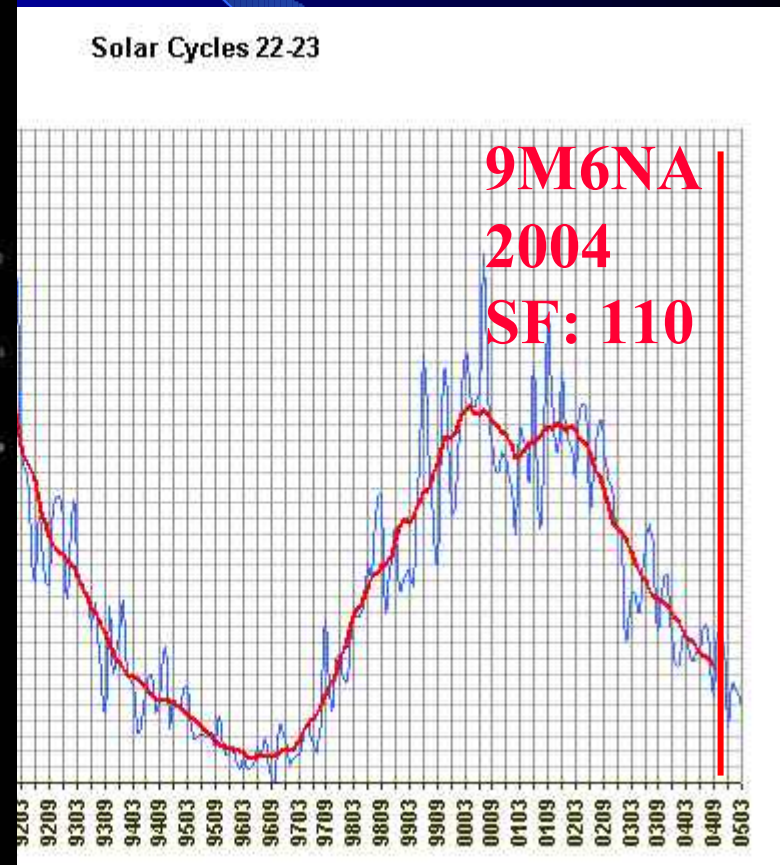

FAILED

9M6NA (2004) 6,294,400 3926/157/405

KH7X (2003) 7,673,314 5256/170/347

Polar Path to far W1-3
Poor Condx on High Bands

My Challenge for New Oceania Record From Labuan as **9M6NA** Continues...

TARGET

Oceania Record by KH7X (2003)

7,673,314 5256/170/347

- **Stay Alive until Next Solar Cycle Peak (2010?)**
- **Work 5000 QSOs or More**
- **Improve 160m / 80m Antennas to Work More Eu Mults**

But, Where is the Best Place to Win Oceania?

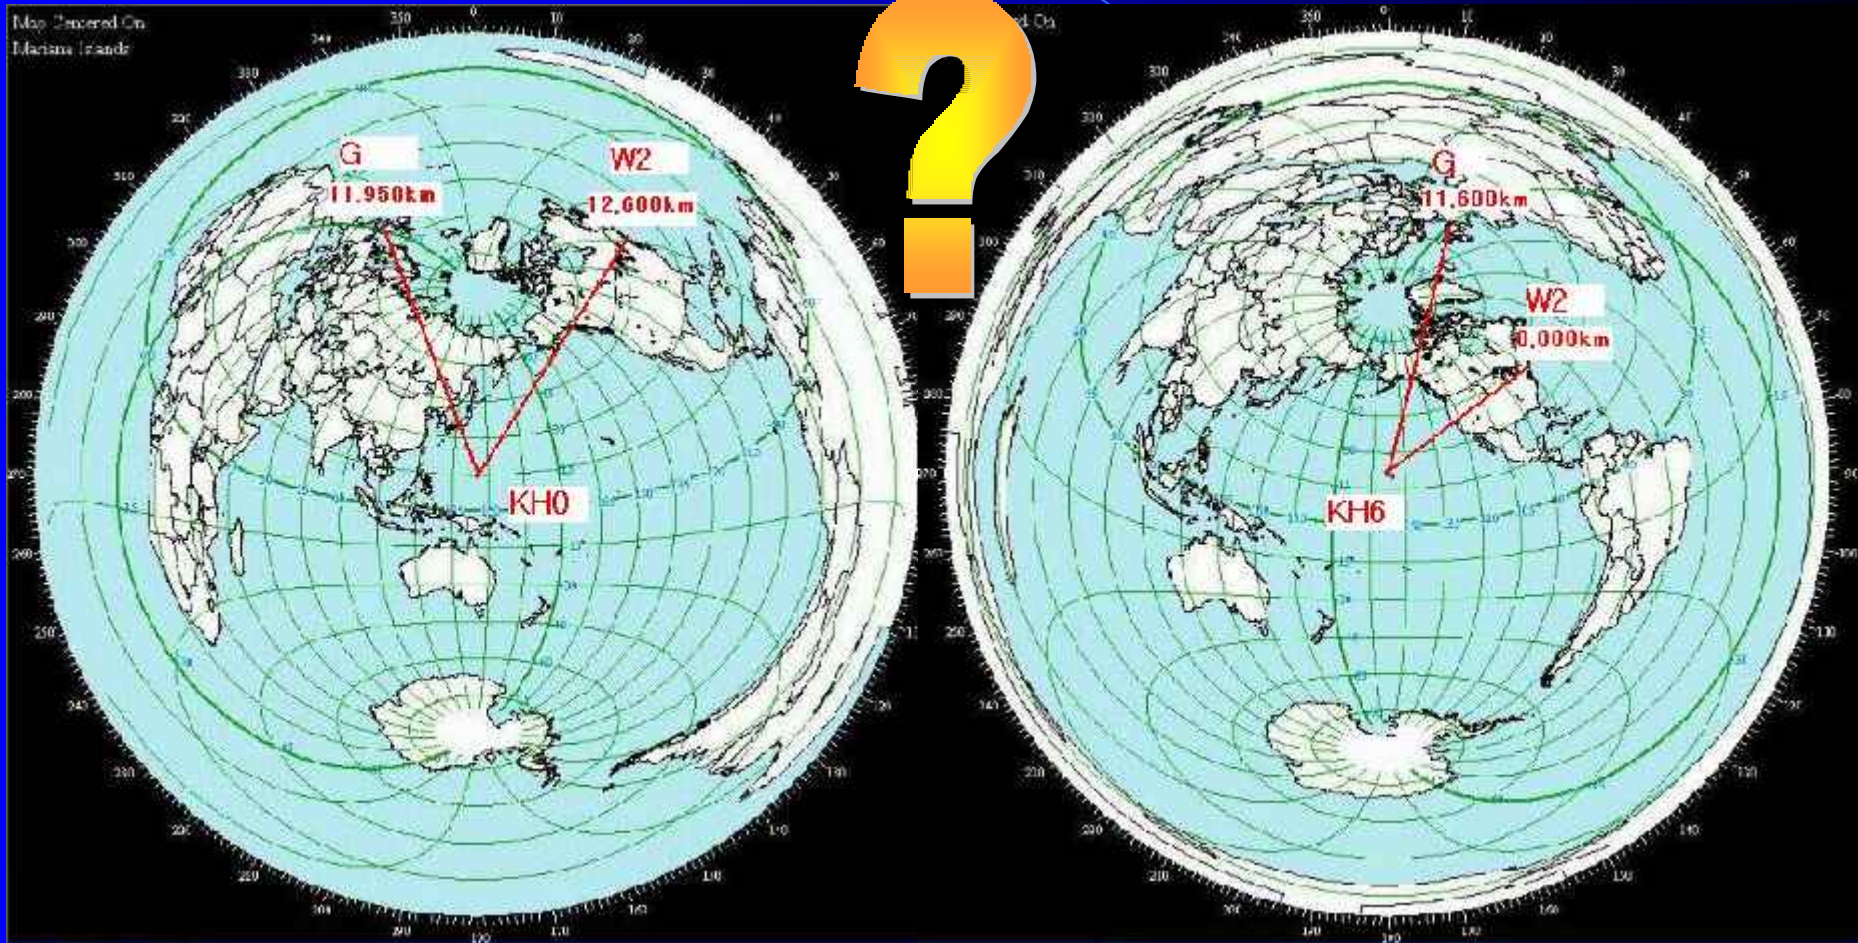

KH0

vs.

KH6

Good Path Both to Eu and US

**Very Short Distance to US
Polar path to Eu**

More Eu Mults / Less US QSOs

More US QSOs / Less Eu Mults

My Answer is

**Oceania M/M Record
KH0AM (SSB 1990 / CW 1992)**

KHO

**Oceania M/2 SSB Record
KH0AA (2003)**

**Oceania M/S SSB Record
KH0AA (2002)**

Oceania M/S and M/2 CW Records - AH2R (2001 / 2002)

Any Plan for a New Contest Station in KH0 ?
